

Rinnai

RINNAI'S GREEN ADVANTAGE ENERGY EFFICIENCY + LUXURY

TANKLESS WATER HEATERS FOR RESIDENTIAL APPLICATIONS

Today more than ever, homebuyers are seeking the benefits of building for the future. And now you can offer an energy-efficient solution to luxurious bathroom upgrades.

SAVE ENERGY and MONEY

- Rinnai provides hot water when you need it, as long as you need it while delivering significant energy savings plus energy cost savings more than that of a traditional tank-type water heater.

CONSERVE WATER

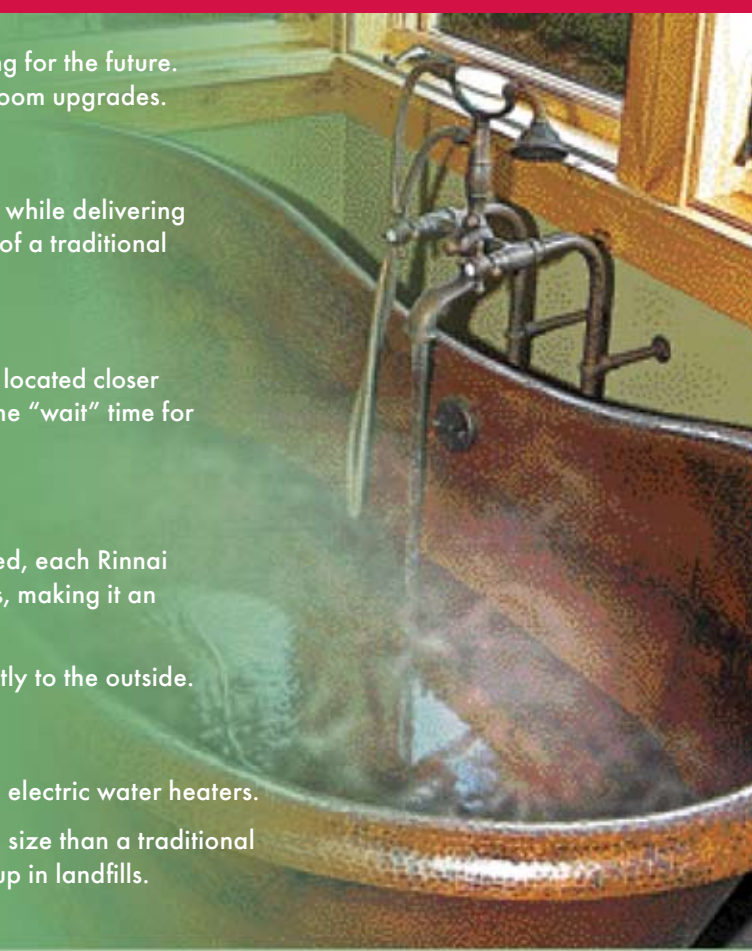

- Direct-vent design allows installation flexibility so the Rinnai can be located closer to fixtures and appliances, saving on water consumption because the "wait" time for hot water is reduced.

CONTRIBUTE TO CLEANER AIR AND A HEALTHIER HOME

- South Coast Air Quality Management District (SCAQMD) approved, each Rinnai produces very low NO_x (LESS THAN 40 Ng/J) and CO₂ emissions, making it an environmentally sound gas appliance.
- The Rinnai internal unit uses no indoor make-up air and vents directly to the outside.

PROTECT NATURAL RESOURCES

- Significantly more energy-efficient than traditional natural gas and electric water heaters.
- With up to a 20-year service life, a Rinnai is significantly smaller in size than a traditional tank water heater, thus reducing the amount of material that ends up in landfills.

GREEN

GET REAL ENERGY EFFICIENT NOW!™

OFFER YOUR CLIENTS A PREMIUM AMENITY AT AN AFFORDABLE PRICE

- Reclaim Precious Space
- Specified in Multiple Zero Energy Home Developments
- Interior & Exterior Installations Available

Increase Your Profits

R63LSe		
R75LSi/e		
R94LSi/e		
R98LSi/e		

- Customer has the option of using the following appliances instead of a shower: residential-grade clothes washing machine or dishwasher.
- Shower heads assumed to be 2.5 gpm mixed flow rate or less. For custom shower fixtures, i.e. body sprays, large rain heads, or tubs over 60 gallons in capacity, please contact Rinnai.
- Bathroom sink faucets assumed to be 2 gpm mixed flow rate or less.
- Assumed mixed temperature on shower heads and bathroom sink faucets to be 105° F.
- Assumed set point of 120°F for the Rinnai.
- Assumed 50 psi - 80 psi inlet water pressure for maximum flow.

Estimated Annual Energy Cost Comparison (2007 Energy Costs)

Maintains efficiency for the life of the Rinnai tankless water heater.

* Source: U. S. Department of Energy (www.doe.gov)

Rinnai R94LSi NG \$223

40-Gallon Gas Tank* \$304

40-Gallon Electric Tank* \$515

Rinnai is continually updating and improving products; therefore, specifications are subject to change without prior notice. Local, state, provincial and federal codes must be adhered to prior to and upon installation.
